

ENGLISH

PRE experiment questions:

1. Do you have any theoretical or practical experience with software development (building a web app, web page etc)?
2. Do you know any programming languages? Which?
3. What has been your experience with AI / LLMs? Do you use them? How often? How (most common usage)?
4. Do you know what vibe coding is? Have you had any experience with it? If yes, what kind?

POST experiment questions:

1. Did you achieve what you wanted to achieve?
2. How do you feel about the user experience? Any comments about using the platform?
3. Do you have any other thoughts, comments, ideas to share about carrying out the task (i.e. creating a piece of software with a vibe coding tool)?
4. Do you feel that you learned something from participating in the experiment?

ESTONIAN

PRE eksperimendi küsimused:

1. Kas sul on teoreetilisi või praktilisi kogemusi tarkvaraarendusega (veebirakenduse, veebilehe jms loomine)?
2. Kas sa oskad mõnda programmeerimiskeelt? Millist?
3. Milline on sinu kogemus AI / suurte keelemudelitega? Kas sa kasutad neid? Kui tihti? Kuidas (peamine kasutusviis)?
4. Kas sa tead, mis on vibe coding? Kas sul on sellega kogemusi? Kui jah, siis milliseid?

POST eksperimendi küsimused:

1. Kas sa saavutasid selle, mida soovisid saavutada?
2. Kuidas sa tunnend end kasutajakogemuse osas? Kas sul on kommentaare platvormi kasutamise kohta?
3. Kas sul on muid mõtteid, kommentaare või ideid seoses ülesande täitmisega (st tarkvaratüki loomine vibe coding tööriistaga)?
4. Kas sa tunnend, et õppisid eksperimendis osalemisest midagi?
